

Internet Governance & the ccTLD Community in the Pacific

Don Hollander

APNIC 26 – August 2008

Diversity

- Geography
- Economy
- Culture
- Telecommunication Technology
- ccTLD Operations Model
- Relationship w/Gov't & Community

Key Issues for ccTLDs

- Resources – People, Skills, Money, Time
- Engagement with Communities – Including Gov't
- Rapidly Changing Technology
- Nefarious Participants
- Confusing Messages

Overcoming Challenges

- Introducing Competition in the Service Industry
- Education – Consumers, Politicians, Officials
- Growing Markets
- Roving Gatherings
- Attack & Disaster Response Planning (ADRP) – Prior Proper Planning Prevents Pitifully Poor Performance

Thank You
